

LeetCode Practice Questions - Topic Wise

Q. No.	LC #	Question Name	Topic
1	1	Two Sum	Array, Hash Table
2	217	Contains Duplicate	Array, Hash Table
3	242	Valid Anagram	String, Hash Table
4	387	First Unique Character in a String	String, Hash Table
5	169	Majority Element	Array, Hash Table, Greedy
6	383	Ransom Note	String, Hash Table
7	49	Group Anagrams	String, Hash Table, Sorting
8	349	Intersection of Two Arrays	Array, Hash Set
9	136	Single Number	Array, Bit Manipulation
10	347	Top K Frequent Elements	Array, Hash Table, Heap
11	125	Valid Palindrome	String, Two Pointers
12	151	Reverse Words in a String	String
13	509	Fibonacci Number	Dynamic Programming, Recursion
14	70	Climbing Stairs	Dynamic Programming
15	50	Pow(x, n)	Recursion, Binary Exponentiation
16	62	Unique Paths	Dynamic Programming, Combinatorics
17	54	Spiral Matrix	Array, Matrix, Simulation
18	78	Subsets	Array, Backtracking, Bit Manipulation
19	46	Permutations	Array, Backtracking
20	39	Combination Sum	Array, Backtracking

Topics Covered

Arrays & Hashing: 1, 2, 5, 8, 9, 10

Strings: 3, 4, 6, 7, 11, 12

Two Pointers: 11

Bit Manipulation: 9, 18

Dynamic Programming: 13, 14, 16

Recursion: 13, 15

Backtracking: 18, 19, 20

Matrix / Simulation: 17

Heap / Priority Queue: 10

Combinatorics: 16

Sorting: 7

Student Instructions

- Solve each problem on LeetCode using the assigned problem number.
- First understand the problem statement and constraints.
- Try a brute-force approach before optimizing.
- Practice writing clean and readable code.
- Revise the underlying topic/pattern after completing each question.
